Antonio Sansotta
Full-stack Developer

SUMMARY

Passionate and receptive full-stack web developer with a deep interest in the MERN stack and SSR applications. Proven track record of creating and implementing successful full-stack applications. Looking to bring my skills to a tech company that is developing interesting things to better the world.

WORK EXPERIENCE

Software Developer at 100devs | Remote

January 2022 — Present

- Collaborated with developers to build MERN stack web applications using best practices such as SOLID and Agile
- Built custom APIs in Node/Express and Sass-customized React frontends
- Created dozens of web applications using core languages and tools such as HTML, JS, Sass, Node, Express, MongoDB, PostgreSQL, and React.

RECENT PROJECTS:

- **MyMenu - Personalized Menu System (Full-stack Web App)** – Fully authenticated application pulling recipes from an external API and allowing friends to order meals from a personalized menu. Built using Express, MongoDB, React, TypeScript, Passport.JS, and Tailwind
- **Onion ERP - Local Labor Union ERP System (Full-stack Web App)** – Adminis manage union members. set up training sessions with certification. and handle dispatches. Built using Express, MongoDB, EJS, and Sass.
- **Ready Up - Online Game Library (Full-stack Web App)** – Users register using a custom Express & JWT authentication process. Web API-based search to find and add games to a MongoDB database. Built using React, Node/Express, Sass, and MongoDB
- **Habitica - Open Source Contribution** - Consolidated component references within Habitica's open source codebase built using Vue and NodeJS.
